# TAMA STAR BUBINGA

MADE IN JAPAN

STAR is the flagship line for TAMA drums. It takes the knowledge and research we cultivated for the Starclassic series to the next level, by reexamining every detail to enhance shell resonance.

STAR Bubinga features a much thinner shell than Starclassic Bubinga. In addition, every shell comes equipped with 9mm thick Sound Focus Rings for structural support. This shell configuration provides clear projection and resonance to highlight the distinct sound of Bubinga.

# TAMA STAR WALNUT

MADE IN JAPAN

STAR is the flagship line for TAMA drums. It takes the knowledge and research we cultivated for the Starclassic series to the next level, by reexamining every detail to enhance shell resonance. Walnut has long been favored by furniture makers for both its beauty and durability. As a drum shell material, Walnut's naturally EQ'ed tone has been praised by the drum community for both the stage and the studio. The STAR Walnut shells project booming low end with enough cut to be heard through any mix.

# STARCLASSIC MAPLE

-Exotic Finishes

In the '80s TAMA's Superstars and Imperialstars reigned supreme - the perfect drums for the times. But TAMA's builders and designers wanted something that transcended trends, something timeless - drums that understood a player's passion and allowed the expression of every genre, style, mood, and technique. They created Starclassic Maple drums...and ignited the thin-shell revolution. And now the new Exotic Finish line offers beautiful, one-of-a-kind exotic wood exteriors for that extra luxurious touch.

# STARCLASSIC PERFORMER B/B

-Premium Lacquer Finishes

The distinct and traditional sound of birch has made it the go-to choice for many pro drummers over the last 30 years. TAMA believes it's time to take birch in an entirely new direction. By using bubinga wood as the inner plies of a birch shell, TAMA has created a blended shell that provides a new sound featuring the focused attack of birch, and the enhanced lows of bubinga.

With nearly 40 years of drum building experience, TAMA knows what drummers really want. With this in mind we sought out to design an affordable yet durable kit that retained many high-end features you'll find in our Silverstar, Superstar, and Starclassic lines. What we came up with was Imperialstar. Every aspect of the modern drum kit was exhaustively examined, reexamined, and then improved before it was accepted as part of the Imperialstar design.

# RHYTHM MATE

TAMA's entry-level Rhythm Mate drum kit provides the precise bearing edges for easy tuning that beginners need and the wide tuning range that pros demand. TAMA's original Accu-Tune Bass Drum Hoops offer faster, more consistent tuning than traditional metal hoops. And if that wasn't enough, the hardware is equipped with double-braced legs for increased stability. TAMA Rhythm Mate drums are changing the way entry-level kits are designed.

# CLAMPS AND ATTACHMENTS

Back in the 1970's TAMA's original introduction of the multi-clamp was a real revolution in the complex instrument we know as the drum kit. Today, multi-clamps are standard equipment in drums of all brands.

## UNIVERSAL CLAMP

### MC66

One side can hold pipes with diameters from 15.9mm to 28.6mm, while the other side is a ratchet holder that can hold a rod from 9mm to 12mm in diameter at various angles. An excellent clamp for adding an array of new set-up possibilities.

## UNIVERSAL CLAMP

### MC67

The heavier duty version of the MC66. One side holds pipes with diameters from 15.9mm to 28.6mm, while the other side is a ratchet holder that can hold a 12mm to 25.4mm diameter rod or pipe at various angles.

## MULTI-CLAMP

### MC61 (US.PAT.NO.6096956)

A basic clamp for connecting stands with pipes from 15.9mm to 28.6mm in diameter with any attachment having a 19.1mm diameter pipe.

## CLOSED HI-HAT

### MXA73N NEW

This closed hi-hat attachment is ideal for double bass playing. The tension adjustment knob makes it possible to finely adjust the degree of opening of the hi-hat cymbals. In addition, the angle of the bottom cymbal is also adjustable, which allows for subtle adjustment of the sound of a closed or half-open hi-hat by changing how air escapes with each hit.
