SUPERSTAR HYPER-DRIVE LIMITED EDITION

FEATURING FIGURED MAPLE OUTER PLY

This Superstar Hyper-Drive kit is a limited-edition model that features a beautiful Figured Maple outer ply. The vibrant contrast between faded finishes and black nickel hardware complement its beautiful wood grain. In addition, the Superstar Hyper-Drive offers superior specifications, such as an all-maple shell, die-cast hoop, and Star-Cast mounting system, which deliver a punchy, clear attack. The Superstar Hyper-Drive limited kit is sure to impress, in terms of both looks and sound.

NEW COCKTAIL-JAM KIT

PORTABLE FULL-FLEDGED DRUM GEAR

The Cocktail-JAM Kit™ (patent pending) is a TAMA original, in both appearance and sound. It's ideal for hip-hop, jazz, intimate acoustic settings, and tight rehearsal rooms. Completely compact, this kit can easily be set up and played using a throne in much less space than a typical drum set. As far as the sound, it goes toe to toe with any standard drum kit, because of its 100% birch shell, equipped with a Sound Arc Hoop and new bass drum mute that provides a punchy, fat sound. Additionally, the Cocktail-JAM Kit and its hardware can be packed into just two bags (included with the kit), making it super portable and easy to transport to any gig.

CJB46C-BOS

Newly Designed "Cocktail-JAM" Badge

"Sound Focus Pad" SFP530 Bass Drum Mute Included (also available as single accessory)

Come with Drum & Hardware Bags

NEW COCKTAIL-JAM **MINI** KIT

PORTABLE FULL-FLEDGED DRUM GEAR

We proudly offer a more compact and easy-to-transport drum kit, the Cocktail-JAM Mini. Its drums are 2 inches smaller in diameter than the full-size Cocktail-JAM Kit. It is compact in size but very scalable, allowing you to add cymbals and cowbells by using our compact clamps and attachments. You can pack the entire kit and its hardware easily into just two bags, which are included with the kit. Get going with drum sound!

IRON COBRA REMOTE HI-HAT STAND

FEATURING JAGWIRE™ TRIPLE-LAYERED ULTRA-SMOOTH CABLE

Our goal with this new Remote Hi-Hat Stand was to create the smoothest action and precision possible, that could go toe-to-toe with high-end traditional hi-hat stands. Accomplishing this is difficult for a number of reasons, including that for most drum setups, the cable needs to bend. After much research and development, we were able to achieve our ambitions by partnering with JAGWIRE™, a company that develops brake cables for the world's best mountain bikes.

The new Remote Hi-Hat Stand offers virtually unlimited setup flexibility for hi-hat positioning, with hardly any sacrifice in feel or response. We hope this will allow drummers to continue exploring new sonic ground and further push the boundaries of music.

FEATURES

JAGWIRE™ Triple-Layered Ultra-Smooth Cable

We developed this cable with the full cooperation of the JAGWIRE™ company, which produces brake cables for some of the world's best mountain bikes. We started with a high strength stainless steel wire that has been proven effective in the most rigorous bike races. We then adopted a three-layer covering for the cable that boasts a very high flex resistance. To achieve the smoothest operation, we first polish the stainless steel wire, and then cover it with a lubricated tube, which reduces friction. Then we cover that tube with a circular hi-carbon coil, and finally wrap that protective covering made of polyvinyl chloride. This exclusive three layered construction leads to extreme durability without sacrificing smoothness or response... even for complex setups which require the cable to be bent in numerous places.

Quick-Set Hi-Hat Clutch

With just one touch, the Quick-Set Hi-Hat Clutch can be attached or removed - simply push the button on the side of the clutch. The clutch also allows the top hi-hat cymbal to float more freely, maximizing the natural resonance of the cymbals.

Lever Glide

The idea of replacing the traditional pull mechanism with a lever design was a genuinely revolutionary concept. Our Iron Cobra version uses roller bearings at the lever fulcrum for even smoother footboard action while a super-strong Kevlar® strap connects the footboard and pull rod for even, noise-free action.

Cable Length Option

HH905RH comes with 2,300mm cable. Shorter 1,200mm cable is available separately.

- HH905RH2L (2,300mm)
- HH905RH2S (1,200mm)

Carrying Bag

Securely holds remote hi-hat stand with hook-and-loop fastener straps inside the bag. Clamp and ratchet arm can be also stored in the inside pocket.

Cable Holders

HH905RH comes with 6 pcs of rotating cable holders, which securely hook the cable with bass drum tension bolt to prevent undue noise and migration.

NEW 1st CHAIR GLIDE RIDER

NOT TOO HARD, NOT TOO SOFT AND CUSHIONY, BUT FEELS GREAT

What determines the first impression of a drum throne is the hardness of the seat. In the moment a drummer sits down on the throne, he/she understands whether it's a suitable fit or not. The final decision is very simple, but it depends on many complicated factors. After detailed investigations into shape, material, stretch of cloth, and method of sewing, we release the new Glide Rider drum throne—it's an ideal balance between softness and hardness we hadn't tried before this. The Glide Rider is available as a Hydraulix model (HT550BCN) and as a tripod-base model (HT530BCN).

HT550BCN

HT530BCN

FEATURES

Glide Rider Seat

The Glide Rider seat's ergonomic contoured shape fits your body and allows easy leg motion. Its design prevents fatigue when playing for long periods.

TAMA HAT STACK

THE EASIEST CYMBAL STACKER EVER

The “Hat Stack” is the simplest and most compact cymbal stacker in TAMA history. It allows you to attach a small diameter cymbal to your hi-hat rod with just a drum key. Also, its tiny size – 25 mm (1”) diameter x 40 mm (1.5”) height – doesn’t interfere with your setup and is super easy to carry. It is a groundbreaking new item that can expand your sound without having to purchase additional clamps.

CSH5

FEATURES

- Easily attach a small cymbal to hi-hat rod measuring up to 7mm in diameter
- Compact size and lightweight for easy transport and storage - 25mm (1”) diameter x 40mm (1.5”) height
- Ability to adjust cymbal sustain

TAMA SOFT SOUND BEATER

PRACTICING QUIETLY, GETTING NATURAL FEEL

Practicing drums quietly is always a challenge, and getting a quieter bass drum sound is one of the toughest problems to overcome. A mesh head or mute pad are some common options, but changing the head is time-consuming, and both lack a natural and accurate feel. This hinders the ability to make any real progress with footwork. To solve this issue, we have developed the Soft Sound Beater. A quieter bass drum is now as simple as switching the beater on your pedal. It provides a significant decrease in volume, but allows you to use your regular bass drum pedal and bass drum head. In addition to practice, it's also useful for low volume gigs and applications.

BSQ10S

FEATURES

- Easy way to decrease bass drum volume
- Natural and accurate feel
- Quick and easy switch from a standard beater
